FOR IMMEDIATE RELEASE

5LINX Enterprises, Inc. Named To Prestigious INC 500 List For the Second Straight Year

ROCHESTER, NY September 10, 2007 — Once again 5LINX has faced off huge competition — from cable companies selling VoIP and land-based phone services — and moved up from last years placement of #338 the on *Inc. Magazines* list of the fastest growing privately held companies in the US to #336 this year.

By focusing on such niche products as its Internet-enabled VideoPhone that lets family and friends talk and *see* each other anywhere in the world, 5LINX Enterprises, Inc. has steadily expanded to an organization that now employs 100 people.

“It translates into over 800% growth over a three-year period,” said 5LINX President/CEO and founding partner Craig Jerabeck. “By offering a good value to our customers and with the help of our highly motivated distributor force, we’ve been able to sustain our growth and build our network.”

(more)

“Our GLOBALINX network and commercial product offerings have accelerated our growth enabling us to capture a greater share of revenue,” said Jeb Tyler a company co-founder and Vice President. “Every day we’re building on our total momentum and we expect to move up again on the list next year in 2008,” he added.

Since its founding in 2001, 5LINX offers both residential and commercial digital phone service for low cost, unlimited local, long distance and international calling rounded out by cell and satellite service that complements its unique VideoPhone. To read more about the Inc. 500 List placement, pick up the September 2007 issue of Inc. 500 or visit the www.5LINX.com.
